Initial Kanban System Design

Building on all the information gathered so far, create your Kanban system.

- You might start with the Commitment Point. Don't forget to create your limited input buffer!
- What are the major elements?
  - Work item types
  - Classes of service
  - Other categories of work?
- How will you use ticket color and swim lanes?
- How to indicate blockers / defects?
- Map workflow states to columns. What is the last column?
- What initial WIP Limits make sense?
- Ticket Design
  - What information is needed to make good quality pull decisions?
- Write down all decisions made into your "Initial Policies".
- Revisit your cadences.
- Do a dry run checking if the mechanics (e.g. allowing pull) work!
